» Trends define the home«

»Trends reshape the world. *They are born out of the constant changes in society and technology. People use trends to express themselves: their personality, attitudes, dreams and emotions. This is where the home they live in is the most important place that reflects their approach to life. Their living space is created by patterns, shapes, colours and materials.*

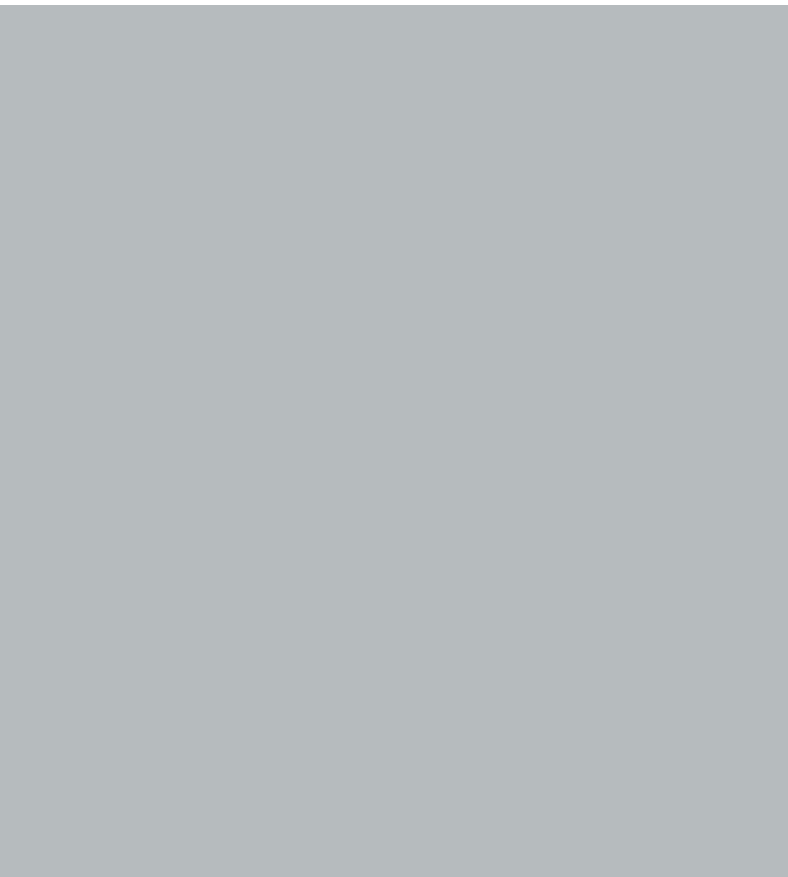

Architecture has a huge influence *on the emergence of trends in home furnishing. It brings spaces into being that unite the spirit of the time with ideas to create something new. Furniture gives these spaces their personality. The design of furniture choreographs home environments that not only provide a detailed reflection of the architecture of the whole but also of personal individuality.*

As a design element, a furniture handle *plays an important part in a room. With little effort, a handle can be used to take a trend to any piece of furniture and provide a powerful impact. To do this, a handle must make a trend a tangible experience. Design, material and feel must be unmistakable. The handle is the first part you touch, the first contact with furniture. As a designer, you always hope your design will create more than a trend and be a product that turns into a design classic.«*

Stephen Williams played a key part in coining the term "Corporate Architecture". In addition to architecture as his core activity, he also provides the interior design in most of his projects. His Hamburg-based company employs fourteen members of staff from the fields of architecture, product design, graphics and project management.

Stephen Williams

TRENDFORUM

Spotting the trend. Intensive research into markets and tomorrow's world as well as watching and analysing relevant preferences and consumer wishes are central aspects of Hettich's innovation management activities. Implementing the latest results of its research in developing, selecting and presenting products for ProDecor, the Hettich trend forum currently defines four trend styles: NEW MODERN, DELUXE, ORGANIC and FOLK. The ProDecor handle range rigidly focuses on market preferences and makes it just as easy for furniture buyers to identify with their own particular style as it does to individualise furniture in line with the latest trends. Discover the trend styles from ProDecor – and the many new ideas for your kitchens and furniture.

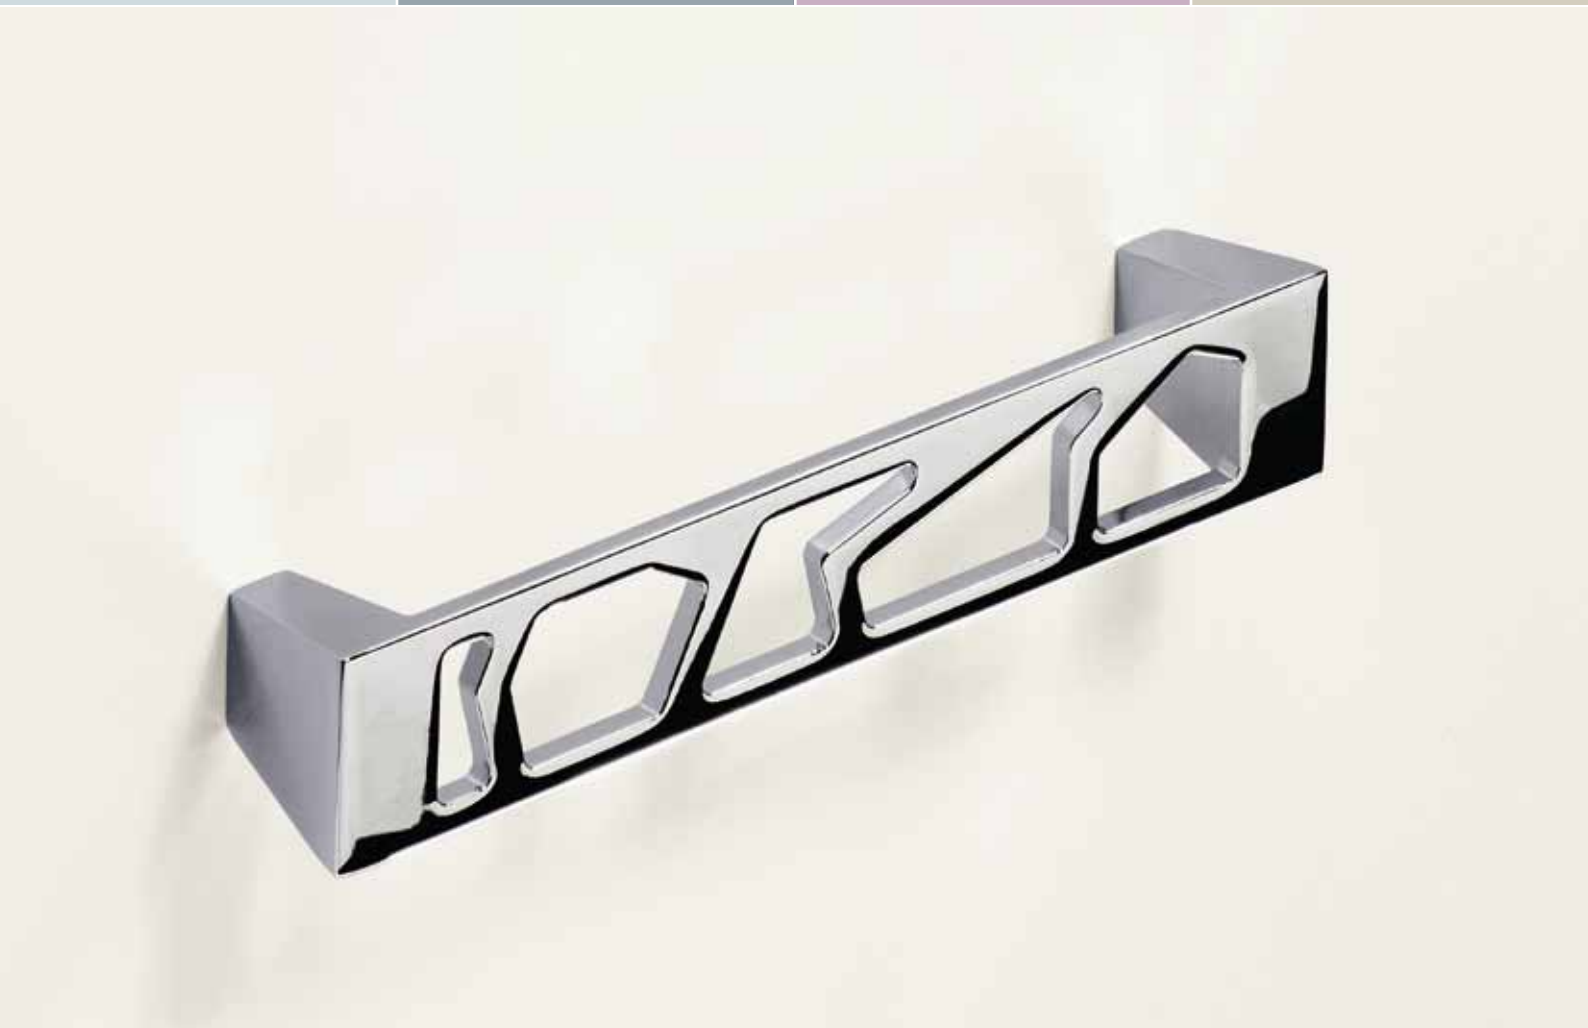

NEW MODERN

Technology, transparency and down-to-earth structures define modern life and the modern home. Futuristic design and clear, reduced shape make NEW MODERN handles truly unmistakable. Their design results from the technical means of producing them and creates exciting, visual statements.

DELUXE

Feeling good takes a little luxury. Whether high-quality surfaces, magnificent patterns or majestic colours – DELUXE combines elements of many cultures and creates a fascinating atmosphere that speaks splendour. Shining metals, combinations with black, white or gold as well as linear or dynamic shapes define the exquisite design of handles from this trend segment.

ORGANIC

The idyll of untouched nature is defined by amorphous structures, soft shapes and diversity of colour. ORGANIC is imaginative in the way it uses these gifts. These handles feature organic shapes that embody this trend. Curved, untreated or rough surfaces are the further mark of an honest home ambience in harmony with nature.

FOLK

Consistency conveys a sense of security. Traditional shapes and colours as well as opulent patterns enrich the everyday world of modern objectivity. The design of the FOLK handle collection skillfully picks up on the colourful combination of styles and materials of the retro look. Strikingly different and expressive in shape, surface and material, these handles give the home a personal touch that underscores the character of those living there.

Touch-in

New perspectives for purist furniture design

Appearing almost handleless, fronts on kitchen, living-room and bathroom furniture conceal the handle function with ingenious simplicity. The spring-loaded trim panel moves back when touched to reveal the convenient finger pull recessed behind.

Touch-in

Individuality meets personal preference

Touch-in provides freedom of design in shape and colour. Ready to install, round and rectangular handles are available in brushed stainless-steel effect or polished chrome. Their modular design produces a wide range of individualised options. Whether matching or contrasting – the trim panel can be coated in the colour of the furniture front or covered with laminate in any preferred effect by the cabinet maker, interior designer and furniture manufacturer.
